

## **CASE No. 9097 – Mountain Water Company**

Mountain Hill Water Company filed for PSC approval to charge up-front connection fees intended to recover all of their investment costs immediately from new water customers. OPC's research determined that no start-up company had been able to recover all their investment costs up-front. After speaking with PSC Staff counsel on April 12, 2007, OPC was able to agree to a three year amortization of the infrastructure cost recovery from the customer base. This agreement resulted in a change from a proposed fee of \$5,300 to approximately \$1,675.00 over three year.
